

SUPPLEMENTARY MATERIAL

Supplementary table 1.

	KOUNIS VARIANTS			
	Type 1	Type 2	Type 3	
<u>Coronary Arteries</u> <u>Conditions</u>	Normal or nearly normal coronary arteries.	Quiescent preexisting atheromatous disease.	stent implantation	
	No predisposing factors for coronary artery disease		3A Coronary stent thrombosis	3B Coronary stent restenosis
<u>Subjacent mechanism</u>	Coronary artery spasm for endothelial dysfunction or microvascular angina.	Coronary artery spasm with plaque erosion or rupture.	Coronary artery stent thrombosis. Infiltration of coronary intima or media and or/adventitia adjacent to stent by eosinophils and/or mast cells.
